

**PROJECT FACT SHEET
CONSTRUCTION GENERAL**

PROJECT NAME AND STATE: Nanty Glo Environmental Restoration, PA

LOCATION AND DESCRIPTION: The abandoned Webster Coal Mine is located in Nanty Glo, Cambria County, Pennsylvania. Water from the mine is discharged into Pergrin Run. The mine water will be treated by constructing a passive treatment system on a 19-acre property between Pergrin Run and South Branch Blacklick Creek. A Successive Alkalinity Producing System consisting of dual vertical flow ponds and a wetland will be constructed to remove acid mine drainage pollutants to promote restoration of the aquatic ecosystem of an estimated 6.2 stream miles of the Lower South Branch Blacklick Creek.

TOTAL PROJECT COST:	\$ 3 , 3 6 0 , 0 0 0
Total Federal Cost:	\$ 2 , 5 2 0 , 0 0 0
Total Non-Federal Cost:	\$ 8 4 0 , 0 0 0

NON-FEDERAL SPONSOR: Cambria County Conservation and Recreation Authority (CCCRA)

CURRENT STATUS: Project construction contract awarded September 6, 2002. Anticipated completion date is July 2004. Above cost includes only the construction phase of the project. Currently the project is experiencing unforeseen site conditions which have increased costs. Therefore the above Total Project Cost will likely increase.

AUTHORIZATION: Section 331, Water Resources Development Act of 1992 (Public Law 102-580).

CONGRESSIONAL INTEREST: Murtha (PA-12)

POC: Kathleen J. Anderson, Project Manager, (412) 395-7178
